with Globalstar Satellite Phones

GSP-1700

Globalstar provides innovative, dependable and affordable satellite-based telephones to communicate virtually anywhere, anytime. Globalstar offers true satellite diversity by operating with a single satellite in view with typically two or more satellites overhead, resulting in fewer dropped calls for users.

The Globalstar GSP-1700 adds ergonomic design for more comfort and convenience. The antenna, when held in a vertical position, communicates with the constellation of Globalstar satellites. It also rotates and stows into the handset when not in use for more compact carrying.

SAI Systems is an authorized reseller for Globalstar satellite phones providing business continuity & disaster recovery.
